

LHAS WELCOMES YOU TO

AN
EVENING OF
ENCHANTMENT

SATURDAY, OCTOBER 26, 2013

OMNI WILLIAM PENN HOTEL

**WE HONOR THE PEOPLE WHO
INSPIRE US EVERY DAY.**

The UPMC Thomas E. Starzl Transplantation Institute is proud to support the 2013 Ladies Hospital Aid Society Gala. Congratulations to Dr. Starzl on receiving the LHAS Doctor of Distinction Award.

UPMC LIFE CHANGING MEDICINE

THOMAS E. STARZL TRANSPLANTATION INSTITUTE

Affiliated with the University of Pittsburgh School of Medicine, UPMC is ranked among the nation's best hospitals by U.S. News & World Report.

WELCOME TO

AN
**EVENING OF
ENCHANTMENT**

— October 26, 2013 —

THE 115TH GALA OF LADIES HOSPITAL AID SOCIETY

LHAS
Ladies Hospital Aid Society
compassion with purpose

Welcome!

FROM THE 2013 CHAIRWOMEN

It is with great pleasure that we welcome you to "An Evening of Enchantment," the 115th LHAS gala. This evening's proceeds will benefit the LHAS Enchanted Forest at UPMC Mercy Trauma and Burn Centers. This "room away from pain" is a calming space where the youngest patients can retreat and indulge in appealing toys and games.

We are proud to acknowledge our awardees. Each has given tirelessly to the community through a wide variety of programs. We are happy to recognize their accomplishments this evening.

We are delighted to have Dr. Andrew Peitzman with us as our Honorary Chair. The Division of General Surgery continues to develop its mission of clinical services, research and teaching under his leadership in the area of trauma.

As transformations in technology and lifestyles occur, we see enhancement and expansion in treatments of burn patients. Tonight we are honoring Dr. Jörg Gerlach and Dr. Alain Corcos for their innovation in the treatment of spray-on skin to transform and heal burn patients. We are thrilled to support their efforts in this emerging field.

We are grateful that Mrs. Margaret Copeland, her son Scott, and her daughter Melissa Parrucci are here to accept the Dr. Charles Copeland Legacy Award. It was his vision that created the Mercy Hospital Burn Center.

We are happy to recognize Dr. Art Levine for his recruitment and retention of talented students and trainees in the medical field.

This year our Doctor of Distinction is the world-renown Dr. Thomas E. Starzl. He made an exceptional mark on the medical community creating new surgical techniques and performed the first successful human liver transplant. It is an honor to have Dr. Starzl with us this evening.

It has been a privilege to serve as co-chairs of the 2013 LHAS gala. The past few months have allowed us to experience first-hand the compassion and dedication of a caring committee. Working together and giving of their time, talents, and resources, they have aided LHAS in its goal to create this "room away from pain." Their effort and enthusiastic commitment are responsible for the success of this event. Special thanks to our President, Carole Kamin, and our Executive Director, Dee Dee Troutman, for their leadership. We would like to recognize Ethel Gelman and Lee Yingling for their dedication to the cause.

We give a special salute to our corporate sponsors, advertisers, patrons and community donors for their generosity and support. The Enchanted Forest is possible because of the help and support of individuals like you, who selflessly give of their time and money, and we thank you.

To everyone in attendance tonight we express our sincere appreciation. We hope that you have an exciting evening and that you leave with the knowledge that you have helped others.

Enjoy the evening,

Judy Woffington and Bev Wukich

Letter from the President

CAROLE L. KAMIN

It brings me great happiness to extend to all of you a warm welcome to the Ladies Hospital Aid Society of Western Pennsylvania's "An Evening of Enchantment" Gala. We are gathered tonight in the grandeur of the Omni William Penn Hotel for an evening of good food and entertainment. But we know it is much more than this.

In 1898, the Hebrew Ladies Hospital Aid Society, the precursor to today's Ladies Hospital Aid Society, was founded on the premise that giving back to the community was both a tradition and an obligation. And, as we acknowledge our 115th year of service to our community, I am proud to say that in a world where the only constant is change, the Ladies Hospital Aid Society of Western Pennsylvania has never wavered from our tradition of caring. We continue to create and support programs that respond to the evolving needs of the community.

On this occasion, I would like to thank you for supporting "An Evening of Enchantment" where you become part of our tradition. Without you, there is no "magic". Our joint efforts will benefit the LHAS Enchanted Forest at UPMC Mercy Trauma and Burn Center. I thank you again, because your support enables our membership to work toward and sustain our mission and purpose to provide educational, emotional, financial, and social service needs to enhance the lives of others. For more than one hundred and fifteen years, LHAS has played an integral role in Western Pennsylvania, meeting the needs of thousands of individuals, families and healthcare professionals by donating more than \$16 million.

I know you will join me in thanking our "Evening of Enchantment" co-chairs, Judy Woffington and Bev Wukich, for this evening's beautiful gala would not be possible without their dedication and commitment. Special thanks to our Executive Director, Dee Dee Troutman, for her continued leadership and guidance, Ethel Gelman and Lee Yingling for their help at a moment's notice. With the help and support of the Gala committee members, this evening will prove to be a grand success.

I would like to recognize and thank our distinguished Honoree, Dr. Andrew Peitzman, as well as the LHAS Awardees. Our partnership has proved to be fruitful and your support has helped make a difference.

Again, I welcome you to our "An Evening of Enchantment" Gala. Enjoy the festivities of this wonderful evening and my thanks to all of you.

Carole L. Kamin
LHAS President

"If you still believe in magic, you're subject to enchantment." –Toba Beta

Andrew B. Peitzman, MD

HONORARY CHAIR

Dr. Andrew B. Peitzman received his undergraduate degree in 1971, and completed his medical school training in 1976 at the University of Pittsburgh. He continued his training in General Surgery Residency at the University of Pittsburgh. In 1981, he accepted a two year fellowship in basic science research at Cornell Medical Center in New York under Dr. G. Tom Shires. In 1981, Dr. Peitzman returned to the University of Pittsburgh to complete his General Surgery Residency under the direction of Dr. Henry T. Bahnson.

Board certified in Surgery and Surgical Critical Care, Dr. Peitzman joined the faculty at the University of Pittsburgh over 29 years ago. His specialties are in General Surgery and Trauma/Critical Care. He was appointed Associate Professor of Surgery, Director of Trauma Services and Assistant Professor of Anesthesiology in 1990. He became Professor of Surgery, Chief, Section of Trauma and Surgical Critical Care and Professor of Anesthesiology in 1996. He was appointed Chief of the Division of General Surgery and Trauma in 1997. Dr. Peitzman became the Executive Vice Chairman for the Department of Surgery in 2002. He received the Mark M. Ravitch Endowed Chair in Surgery in 2008, and currently holds the position of Distinguished Professor of Surgery and UPMC Vice-President for Trauma and Surgical Services.

Dr. Peitzman has received several honors and awards including multiple teaching awards. He holds office on numerous committees, local, state and national, including the American Association for Surgery of Trauma, President 2009-2010; Chairman, Trauma Summit Committee 2010-2012 (AAST, COT, EAST, WTA); American College of Surgeons, Mentoring Program for Junior Faculty in Surgery; Eastern Association for the Surgery of Trauma; Pittsburgh Surgical Society; and the Panamerican Trauma Society, where he held the title of President from 2007-2008 and Executive Director from 2008-2010. He has also served in the American College of Surgeons on the National Committee on Trauma.

Dr. Peitzman has made over 350 presentations on General, Trauma and Surgical Critical Care topics in the U.S. and international countries. He has published 183 peer reviewed publications and 90 book chapters. He has written 11 books including The Trauma Manual, in its fourth edition, and has been the principal investigator for over 13 funded grants.

Dr. Peitzman's responsibilities include the quality of care and trauma system development for all the UPMC trauma centers, including Children's Hospital of UPMC, UPMC Altoona, UPMC Hamot, UPMC Mercy and UPMC Presbyterian. Beyond his distinguished career, Dr. Peitzman continues to keep patients and their families at the forefront of his mission. He leads by both example and commitment.

Charles E. Copeland, MD

VISIONARY LEGACY AWARD

Charles E. Copeland, MD had a long and distinguished career at UPMC Mercy as an innovator and physician leader in providing the highest quality healthcare to his patients.

Dr. Copeland was a loving husband, devoted father of three children (Charles Edward III, Scott Copeland and Melissa Copeland Parrucci) and grandfather to three adored grandchildren, (Melinda Lammert, Cameron Copeland, and Mia Parrucci).

Married to Margaret Beatty Copeland for more than 50 years, Dr. Copeland recognized the sacrifices his family made in sharing him with the medical profession and his patients.

Dr. Copeland graduated from the University of Pittsburgh School of Medicine and began his career at Mercy Hospital of Pittsburgh as an intern and general surgery resident. Dr. Copeland held many leadership positions at Mercy Hospital including Chairman of the Department of Surgery, President of the Mercy Medical Staff, Clinical Professor of Surgery at the University of Pittsburgh and Program Director of the General Surgery Residency Program. He was a major contributor to the ongoing success of the Graduate Medical Education Program. Dr. Copeland's leadership extended beyond the hospital setting, to include serving as President of the Pennsylvania Chapter of the American College of Surgeons and The University of Pittsburgh Medical Alumni Association. Dr. Copeland was honored with numerous prestigious awards.

Pittsburgh, with its early history as a leading steel maker in the country, as well as other manufacturing and industrial enterprises, provided significant challenges for the care of injured workers. Industrial accidents and burn injuries occurred with high frequency. Dr. Copeland recognized the need for specialized burn and trauma care. Dr. Copeland was a founding board member of the Pennsylvania Trauma Systems Foundation and in 1967 established the Mercy Hospital Burn Center- the first in Pennsylvania and 17th in the United States. His dedication and compassion allowed Mercy Hospital to reach out to the most vulnerable and at-risk population. Dr. Copeland's core values ensured that the highest possible care would be given to all patients, regardless of their financial or social circumstances.

In 1987, Dr. Copeland established a burn fund to support patients and their families as well as the mission of the Mercy Burn Center. Dr. Copeland made the first charitable gift to support the Charles E. Copeland Burn Fund. The Fund ensures that the Burn Center is able to do research, educate the community, provide state-of-the-art equipment, and never turn away a patient in need regardless of financial resources. The fund is maintained by generous individual donors, as well as a number of community fundraising events.

Because of Dr. Copeland's vision, The UPMC Mercy Burn Center continues the mission of being a transforming and healing presence within the community providing cutting-edge trauma and burn care to the citizens of the tri-state region. Dr. Copeland was a true gentleman and scholar. Dr. Copeland was an early mentor to many current physician leaders of UPMC, including Dr. Andrew Peitzman, UPMC Vice-President for Trauma and Surgical Services and leaves his legacy under the expert leadership of Dr. Harry "Skip" Sell, Chairman of the Department of Surgery at UPMC Mercy, who worked with Dr. Copeland for more than 30 years.

Alain Corcos, MD

INNOVATION AWARD

Alain Corcos, MD, FACS is a graduate of Oregon Health Sciences University who completed his general surgery residency and internship at St. Luke's-Roosevelt Hospital Center in New York. Dr. Corcos also completed a Trauma and Critical Care fellowship at University of California-San Diego (UCSD). After an additional year of Research Fellowship at UCSD, Dr. Corcos began his career at Mercy Hospital in 1999.

Dr. Corcos, married to wife Leyvoy, and the father to sons Eli and Aaron, was appointed UPMC Mercy Section Chief of Surgical Critical Care and Trauma Medical Director in 2008. As an active trauma and burn surgeon, Dr. Corcos has treated hundreds of trauma and burn patients. He has a keen sense of the innovative care necessary in the treatment of trauma and burn victims. It is with this commitment, that Dr. Corcos has been instrumental in placing into practice the spray on skin therapy for burn patients developed by Dr. Gerlach and the McGowan Institute for Regenerative Medicine.

Dr. Corcos has distinguished himself as a generous partner, reliable leader, committed educator, and passionate practitioner. In addition to training many surgical residents, EMS providers, and nurses, Dr. Corcos continues his commitment to burn and trauma research. Under Dr. Corcos's leadership, The UPMC Mercy Trauma and Burn Centers continue to advance the care and treatment of patients in the tri-state area.

Jörg C. Gerlach, MD, PhD

INNOVATION AWARD

Dr. Jörg C. Gerlach is a MD with background in surgery and transplantation medicine and a PhD in bioengineering. He works on technologies for the clinical translation of bio-engineering and stem cell biology research into cell-based therapies in regenerative medicine. Dr. Gerlach directs the the interdisciplinary Bioreactor Group in the McGowan Institute for Regenerative Medicine, in the University of Pittsburgh, PA, USA. Within a joint appointment, with the Charité Berlin, he also directs the Charité Bioreactor Group of the AG Experimentelle Chirurgie. In Berlin, he is member and initiator of the Berlin Center for Regenerative Therapies (BCRT) of the Charité. He also initiated the CellNet Initiative with the www.CellNet pages and the Who is Who in Regenerative Medicine, as well as the Berlin Regenerative Medicine Initiative. Currently, he establishes a network of groups focussing 3-D in vitro culture bioreactor development for regenerative medicine research, including the group at ISMETT inPalermo, Italy.

His biomedical research projects focused on artificial organs (e.g. trachea replacement), hybrid organs (e.g. endothelial cell seeded vascular prostheses), on bio-artificial systems (liver support systems for extracorporeal organ regeneration), and on cell production systems for cell-based therapy.

Dr. Gerlach is internationally recognized for his work in developing biotechnology methods, and technology for primary cells and stem cells. He is educated in surgery, hepatology, intensive care, and experimental transplantation medicine. He has experience as principal investigator for clinical studies. In addition Dr. Gerlach has an engineering background with expertise in bioreactor development.

Dr. Gerlach is primary research interests include maintenance and differentiation of cells in vitro for extracorporeal, temporary clinical use as a hybrid organ; production of cells for transplantation in cell-based therapy; production of regenerative mediators by cells in bioreactors for systemic drug therapy and regenerative medicine applications.

His primary focus has been the use of liver cells, but he, and members of his research groups in both Berlin and Pittsburgh, are also using skin, bone marrow, neuronal, and stem cells. He received his MD/PhD (1987) from Freie Universität, Berlin, his Habilitation in Experimental Surgery (2001) from Humboldt University, Berlin, and a second PhD in Bioengineering (2002) from Strathclyde University, Glasgow, Scotland.

Dr. Gerlach was the recipient of the 1989 Young Researcher Award of the International Society for Artificial Organs and the 1996 Young Researcher Award of the European Society for Artificial Organs (ESAO).

Dr. Gerlach is the first author of over 100 peer-reviewed publications, and several patents. His publications deal with organ replacement, tissue engineering, bio-medical technology engineering, as well as with transplantation medicine, transplantation immunology, and organ preservation.

Congratulations to
Arthur S. Levine
Ladies Hospital Aid Society
2013 Distinguished
Medical Educator

from his fellow deans
of the University of Pittsburgh
schools of the health sciences:

Thomas W. Braun, DMD, PhD
School of Dental Medicine

Clifford E. Brubaker, PhD
School of Health and Rehabilitation Sciences

Donald S. Burke, MD
Graduate School of Public Health

Jacqueline Dunbar-Jacob, PhD, RN, FAAN
School of Nursing

Patricia Dowley Kroboth, PhD
School of Pharmacy

Arthur S. Levine, MD
DISTINGUISHED MEDICAL EDUCATOR

Senior Vice Chancellor for the Health Sciences and the John and Gertrude Petersen Dean,
University of Pittsburgh Schools of the Health Sciences

Dr. Levine became Senior Vice Chancellor for the Health Sciences and Dean of the School of Medicine at the University of Pittsburgh in 1998. The faculty of the University of Pittsburgh ranks fifth nationally in NIH research funding in 2008, and Dr. Levine has been instrumental in fostering the University's remarkable research trajectory.

He has focused his priorities on studies that exploit the vast amount of data emerging from the human genome project and on the newly emerging and powerful technologies that enable us to visualize the three-dimensional structures, locations, and interactions of the proteins encoded by genes as they exist at particular times in particular cells. With respect to education, Dr. Levine has initiated new mechanisms designed to enhance the recruitment and retention of talented students and trainees with the goal of helping to reverse the precipitous decline across the nation in the numbers of young physicians and other health science students embarking upon substantive careers in research and education.

Beyond his University responsibilities, Dr. Levine works closely with the University of Pittsburgh Medical Center (UPMC), one of the largest academic medical centers in the U.S., to ensure that health care delivery, biomedical research, and education the three legs of the classic academic stool remain equally strong and well positioned for future growth.

Prior to his appointment to the University of Pittsburgh, Dr. Levine served at the National Institutes of Health for more than three decades, having joined the National Cancer Institute in 1967. From 1982 to 1998, he was the Scientific Director of the National Institute of Child Health and Human Development, widely recognized as one of the world's leading centers in developmental biology.

Earlier in his career, Dr. Levine played a leading role in clinical research on childhood malignancies, and he was one of the first to carry out systemic investigations on the prevention and treatment of opportunistic infections in patients with cancer. He has also been engaged in molecular biologic research. He and his colleagues carried out the first physical and genetic mapping of SV40, a mammalian tumor virus. These investigators were also the first to work on naturally occurring viral recombinant DNAs, and the results provided an important source of information in the beginning of the recombinant DNA era. Dr. Levine continues to direct his own laboratory, which is focused on the molecular mechanisms that maintain the fidelity of the genome.

Dr. Levine, who has authored or co-authored more than 250 scientific publications, has been widely recognized for his achievements. He has chaired numerous national and international scientific meetings, been elected to membership in a number of the leading research societies and has held visiting professorships and distinguished lectureships at many universities here and abroad. Dr. Levine has served on the editorial boards of four scientific journals and was editor-in-chief of *The New Biologist*, a journal of cellular and molecular biology. He received the Meritorious Service and the Distinguished Service Medals of the United States Public Health Service, The Surgeon General's Exemplary Service Medal, the NIH Director's Award, and the Distinguished Alumnus Award and an Honorary Doctor of Humane Letters degree from the Rosalind Franklin University of Medicine and Science, Chicago, IL.

Kirby Wilson

PATIENT ADVOCATE AWARD

Kirby Wilson is in his seventh season as the Steelers' running backs coach. Wilson, who was hired on January 29, 2007, came to Pittsburgh with 19 years of coaching experience at both the collegiate and professional levels.

In Wilson's 15 years as a running backs coach in the NFL, he has tutored four of the top-25 rushers in NFL history (Emmitt Smith, Curtis Martin, Edgerrin James and Thomas Jones).

Wilson, 51, has been instrumental in the rising contributions from Isaac Redman and Jonathan Dwyer, and was instrumental in the success of former Steeler Rashard Mendenhall.

In 2012, the Steelers had a 100-yard rusher in three straight games (Weeks 7-9). Dwyer recorded his second and third career 100-yard rushing games in back-to-back weeks. In Week 7 at Cincinnati, Dwyer recorded a career-high 122 rushing yards, and the following week versus Washington, Dwyer rushed for 107 yards. In Week 9, Redman recorded a career-high 147 rushing yards against the New York Giants at MetLife Stadium.

In 2011, Wilson helped the Steelers achieve success on the ground by using a number of running backs. The backs combined to total 1,903 rushing yards on 434 carries, averaging 4.4 yards per carry, marking the third consecutive season that Pittsburgh averaged over 4.0 yards per rush.

In 2010, Mendenhall set a career high with 1,273 rushing yards, ranking him seventh in the NFL. Mendenhall had three 100-yard games and a career-high 13 rushing touchdowns.

In 2009, Wilson was instrumental in Mendenhall's breakout season as he posted his first career 1,000-yard rushing season with 1,108 yards on the year and a team-high seven rushing touchdowns. In 2007, Wilson helped Willie Parker earn his second consecutive Pro Bowl selection and lead the NFL in rushing through the first 16 weeks, before he broke his leg in the second-to-last game of the season.

Wilson entered the coaching arena on the staff at Pasadena City College (1985) as wide receivers coach. After earning a bachelor of arts degree from Eastern Illinois in 1989, he returned to the sidelines at Los Angeles Southwest Community College (1989-90) as quarterbacks and wide receivers coach.

A running back and wide receiver at Pasadena Community College (1979-80) and the University of Illinois (1980-81), Wilson played two seasons in the Canadian Football League as a defensive back and kick returner for the Winnipeg Blue Bombers (1983) and Toronto Argonauts (1984).

Born in Los Angeles, Calif., Wilson was on the football and track teams at Dorsey High School in his native Los Angeles. Wilson has five children; sons Kris, Michael and Tyler, and daughters Malia and Savanna.

Thomas E. Starzl, MD, PhD

2013 DOCTOR OF DISTINCTION

Thomas E. Starzl, MD, PhD, is known to most as the "Father of Transplantation" and a thinker who has been, and continues to be, well ahead of his time. By laying the groundwork for a new field of medicine, throughout his career he has continued to make among the most significant landmark advancements in medicine and science - from identifying better ways to control organ rejection to offering novel approaches that enhance understanding of disease processes. In recent years, he has made important discoveries about tolerance, which have completely changed the conventional paradigms of transplant immunology.

Retired from clinical and surgical service since 1991, Dr. Starzl still devotes his time to research endeavors and remains active as Distinguished Service Professor of Surgery at the University of Pittsburgh School of Medicine and with the program named in his honor: the Thomas E. Starzl Transplantation Institute of the University of Pittsburgh and the University of Pittsburgh Medical Center (UPMC).

Dr. Starzl was born March 11, 1926 in LeMars, Iowa, the son of a newspaper editor. He attended Westminster College in Fulton, Mo., where he earned his bachelor's degree in biology. He went on to the Northwestern University Medical School in Chicago, where in 1950 he received a master's degree in anatomy and in 1952 earned both a doctoral degree in neurophysiology and a medical degree with distinction.

Following postgraduate work at Johns Hopkins Hospital in Baltimore, Dr. Starzl pursued his interest in surgery and research with a fellowship and residencies at Johns Hopkins, the University of Miami and the Veterans Administration Research Hospital in Chicago. He was a Markle Scholar in Medical Science, a distinguished honor bestowed annually to a small group of exceptionally promising young physicians in academic medicine. Dr. Starzl served on the faculty of Northwestern University from 1958 to 1961 and joined the University of Colorado School of Medicine as an associate professor in surgery in 1962. He was promoted to professor in 1964 and served as chairman of the department of surgery from 1972 to 1980.

Despite prevailing worldwide pessimism regarding the ability to transplant allogenic (non-identical) human kidneys, Dr. Starzl successfully combined azathioprine (Imuran) and corticosteroids in allogenic kidney transplants performed in 1962 and 1963, leading to the largest series of kidney transplants and invigorating clinical attempts throughout the world. The lessons learned from kidney transplantation and discoveries made by his team on liver physiology led Dr. Starzl to perform the world's first human liver transplant in 1963 and the first successful liver transplant in 1967 both at the University of Colorado. Dr. Starzl and his transplant team went on to perform approximately 1,000 kidney and 200 liver transplants at Colorado General and Denver Veterans Administration hospitals.

In addition to developing azathioprine and corticosteroid immunosuppression, Dr. Starzl subsequently introduced anti-lymphocyte globulin and cyclosporine. It was this development in

Thomas E. Starzl, MD, PhD

2013 DOCTOR OF DISTINCTION

1980 that advanced transplantation from an experimental procedure to an accepted form of treatment for patients with end-stage liver, kidney and heart disease. It also allowed surgeons to explore the feasibility of transplanting other organs, such as the pancreas and lung.

Dr. Starzl joined the University of Pittsburgh School of Medicine as professor of surgery in 1981. Until 1991, he served as chief of transplantation services at Presbyterian University Hospital (now UPMC Presbyterian), Children's Hospital of Pittsburgh and the Veterans Administration Hospital in Pittsburgh, overseeing the largest and busiest transplant program in the world. He then assumed the title of director of the University of Pittsburgh Transplantation Institute, a post that permitted his full attention to research. In 1996, the Institute was renamed in his honor. He now holds the title of director emeritus.

In 1989, Dr. Starzl announced the first-time use of a more effective anti-rejection agent, FK506 (tacrolimus), presaging other significant advancements in transplant medicine, whereby patient and graft survival rates for liver and other organ transplants greatly improved and successful clinical intestine transplantation, previously fraught with unacceptably high rejection rates, was made possible for the first time. Dr. Starzl and his team at the University of Pittsburgh Medical Center had been instrumental in the development of the drug since 1986; in 1994, the U.S. Food and Drug Administration approved the drug for clinical use.

Under Dr. Starzl's leadership, the Thomas E. Starzl Transplantation Institute also has researched the feasibility of cross-species, or xenotransplantation, for addressing the chronic shortage of human organs. In 1992 and 1993, Dr. Starzl's team made medical history when surgeons performed two baboon-to-human liver transplants. Dr. Starzl himself had performed six baboon-to-human kidney transplants in 1963 and 1964 and the world's first chimpanzee liver xenotransplants in three children between 1969 and 1974.

A major focus of Dr. Starzl's current research is transplant tolerance and chimerism—the coexistence of donor and recipient cells—which has already offered significant contributions to the understanding of transplant immunology, particularly with respect to how and why organs are accepted.

Among the more than 200 awards and honors bestowed to Dr. Starzl are: the David M. Hume Memorial Award from the National Kidney Foundation for furthering the understanding of kidney diseases, kidney transplantation and the physiology of the kidney; the Brookdale Award in Medicine presented by the American Medical Association Board of Trustees and the Brookdale Foundation for significant contributions to the field of clinical medicine, teaching and research; the Bigelow Medal from the Boston Surgical Society; the City of Medicine Award; the Medallion for Scientific Achievement presented by the American Surgical Association; the William Beaumont Prize from the American Gastroenterological Association for outstanding contributions to the field and practice of gastroenterology; the Peter Medawar Prize of The Transplant Society; the Jacobson Innovation Award of the American College of

Surgeons; the 1998 Lannelongue International Medal, which is awarded every five years by the Academie Nationale De Chirurgie (National Academy of Surgery, France); the 2001 King Faisal International Prize for Medicine; the Rhoads Medal of the American Philosophical Society; the 2002 Prince Mahidol Award; the 2004 Presidential National Medal of Science; and 24 honorary doctorates from universities in the United States and abroad.

Dr. Starzl's national and international endeavors include membership in more than 60 professional and scientific organizations, including election as president of The Transplantation Society, founding president of the American Society of Transplant Surgeons and founding president of the Transplant Recipients International Organization. In 1992, he was inducted as one of only five American members into the prestigious National French Academy of Medicine. A sought-after speaker, Dr. Starzl has given more than 1,300 presentations at major meetings throughout the world. He belongs to the editorial boards of 40 professional publications and has authored or co-authored more than 2,200 scientific articles, four books and 300 book chapters.

Dr. Starzl has earned additional distinctions. According to the Institute for Scientific Information (ISI), Dr. Starzl once averaged one paper every 7.3 days, making him one of the most prolific scientists in the world. In 1999, ISI identified Dr. Starzl as the most cited scientist in the field of clinical medicine, a measure of his work's lasting influence and utility. The book, *1,000 Years, 1,000 People: Ranking the Men and Women Who Shaped the Millennium*, placed Dr. Starzl 213th on its list of those whose contributions have significantly influenced history's progress.

Dr. Starzl's autobiography, *The Puzzle People: Memoirs of a Transplant Surgeon*, was published by the University of Pittsburgh Press in 1992. Translations have been published in Italian, Japanese, Korean and Spanish. All author's royalties are donated to the Transplant Recipients International Organization.

Making a Difference in 2013

Ladies Hospital Aid Society is dedicated to its mission "To deliver support for educational, emotional, financial and social service needs to enhance the lives of others." Our members, volunteers, contributors and staff members have made the following programs and projects possible through their generous donations of time, money and resources:

- 2012 Rooted in Compassion Gala raised **\$110,000** to benefit LHAS Teen Dating Violence Awareness and Prevention Program Partnering with the Demi Brae Cuccia Awareness Organization to educate teens to build healthy relationships
- 2011 Here's Looking at You, Kid Gala raised **\$150,000** to benefit the LHAS Patient Support and Operations Fund for Pediatric Plastic Surgery at Children's Hospital of Pittsburgh of UPMC
- 2010 The BEST is yet to come! Gala raised **\$100,000** to benefit the University of Pittsburgh Graduate School of Public Health for research on Aging and Longevity
- 2009 Come Fly With Us...Gala raised **\$50,000** to benefit the University of Pittsburgh School of Medicine Digestive Disorders Center (DDC) for research on Pancreatic Cancer, Colon Cancer and other Digestive Diseases
- 2008 Head Over Heels Gala raised **\$100,000** to benefit the University of Pittsburgh Department of Orthopaedic Surgery and concussion research
- 2007 Music, Magic, and Moonlight Gala raised **\$65,000** to benefit the McGowan Institute for Regenerative Medicine
- 2006 A Night With The Stars raised **\$35,000** to benefit LHAS Community and Social Service Projects
- 2005 In Full Bloom Gala "Heaven on Earth" raised **\$50,000** to benefit LHAS Community and Social Service Projects
- 2004 In Full Bloom Gala, over **\$1 million** was presented to the following organizations for programs and projects: LHAS Arbor at Weinberg Village in Squirrel Hill; LHAS Breakfast Club at the Jewish Community Center; Jewish Family & Children's Services; LHAS/Ratner Tower at Riverview; University of Pittsburgh Cancer Institute; UPMC Palliative Care; and UPMC for social services for the indigent patients
- 2003 Remember When: An Evening with LHAS and Neil Sedaka raised **\$94,000** to benefit the Thomas E. Starzl Transplantation Institute at the University of Pittsburgh Medical Center
- 2002 An Evening of Laughter featuring Jerry Seinfeld raised **\$85,000** for Working Hearts at The Jewish Healthcare Foundation
- 2001 Fiesta Latina featuring Arturo Sandoval raised **\$25,000** for LHAS Women's Health Projects
- 2000 Giggles and Glamour featuring Phyllis Diller raised **\$100,000** for the LHAS Center for Prevention and Early Detection in the Hillman Cancer Center

History of LHAS

In 1898, Ladies Hospital Aid Society began its long history of community service when 17 women met to address the pressing needs of the sick and the poor living in their neighborhoods. These women also were concerned with the troubles facing the immigrant population, which suffered from indigence, homelessness and lack of adequate medical care. Referring to themselves as the Hebrew Ladies Hospital Aid Society, this group set membership dues at 10 cents a week and made arrangements with existing hospitals to pay ward rates for patients admitted under their auspices.

Ladies Hospital Aid Society continued to prosper and among its many accomplishments was the opening of the original Montefiore Hospital in 1908, and the construction of the current site in 1929. LHAS raised more than \$5 million for Montefiore Hospital and initiated and funded the Follow-Me-Home program and the LHAS Ambulatory Surgical Center. In 1990, Montefiore Hospital was sold to Presbyterian Hospital, and subsequently became part of the University of Pittsburgh Medical Center.

LHAS in turn expanded its mission and has remained responsive to changing health care needs of the entire Western Pennsylvania community. LHAS has implemented programs for the elderly and women's health care, including the LHAS Arbor at Weinberg Village, LHAS Prevention and Early Detection Center at the Hillman Cancer Center and the LHAS Women's Heart Center. Fulfilling our commitment to education, LHAS has allocated thousands of dollars for college scholarship grants to future health care professionals and nursing students.

Through a variety of fundraisers, LHAS is able to sustain its mission and purpose by providing educational, financial, medical and social services to the community.
